

EExPolytech-2020 was held in Polytech

The third annual international conference on electronics and photonics was held at the Polytech on October 15-16 [EExPolytech-2020](#).

This time the conference was held in an unusual online format. Oral and poster sections were organized for the participants, open for active online discussions. A separate plenary session was organized, where invited speakers Jian Song (China), Pablo Angueira (Spain), Sergey Andreev (Finland), and Vladislav Malyshevkin (Russia) spoke.

In total, 170 scientists from more than 15 countries took part in the conference, including the USA, Mexico, India, Ecuador, Italy, Armenia, etc.

The participants' reports were divided into 4 main sections: Circuits & Systems for Telecommunications; Algorithms & Signal Processing; Materials & Nanoscience; Photonics. The best oral and poster presentations in each section were awarded diplomas.

Conference materials will be submitted for publication in the IEEE Xplore database.
